

Table II. Treatment of rare coagulation factor deficiencies

Factor Deficiency	Treatment	Target hemostatic level
Fibrinogen	Fibrinogen concentrate, cryo	➤ 50 mg/dL
Prothrombin	PCC, FFP	20–40%
Factor V	FFP	20–40%
Factor VII	rFVIIa	15–20%
Factor X	PCC, FFP	15–20%
Factor XI	Factor XI concentrate, rFVIIa, FFP	30–40%
Factor XIII	Factor XIII concentrate, FFP, Cryo	2–5%
FCFD type 1	FFP and FVIII	30%
FCFD type 3	Vitamin K, FFP, PCC	15–20%

Legend:

Cryo = cryoprecipitate

FFP = fresh-frozen plasma

PCC = prothrombin complex concentrate
